Data Source: Maine Hospital Inpatient Database; Maine Health Data Organization.

Diabetes Hospital discharges are defined as discharges in which Hospitalization with Diabetes was the principal diagnosis, ICD-9-CM code 250.

Crude rates are hospital discharges per 100,000 population.

Age-adjusted rates are hospital discharges per 100,000 population age-adjusted to the U.S. 2000 standard population.

95% CI: 95% confidence interval of the rate.

NApp: Not applicable, age-adjusted rates are not calculated for age-specific groups.
